RN: _____

YOUR COMFORT IS IMPORTANT TO US

Pain is expected after surgery. Our goal is to help you achieve a tolerable pain level. This is the pain scale we will use to assess your pain level:

PAIN MEASUREMENT SCALE

0	1-2	3-4	5-6	7-8	9-10
no pain	mild pain annoying nagging	discomforting troublesome nauseating numbing	distressing miserable agonizing gnawing	intense dreadful horrible vicious cramping	excruciating unbearable torturing crushing tearing

Acceptable/Tolerable Pain Level:_____

There are several things we can do to help you achieve a tolerable pain level:

- Pain medications
- Ice packs
- Warm blankets
- Teaching you how to splint your incision sites when coughing and moving
- Repositioning/moving
- Decreasing stimulation, for example dimming the lights

Discharge goals:

- Your pain level is tolerable at rest
- You can tolerate drinking fluids; nausea is controlled
- Walking or you are able to tolerate sitting up in a chair
- Urinating prior to discharge, if indicated for your surgical procedure
- Your questions answered; your worries and concerns addressed
- Understanding your discharge instructions and how to use new medications

Pain medications:

☐ Teach back completed
