Order No: 49554 Reprint Previous Order No: 17832
 Order Date: 2019-10-17
 User: Alicia Mullett
 Phone: 9893932850

Ship Location: **MCLAREN OCCUPATIONAL HEALTH**
 801 Joe Mann Blvd Suite A 1st Floor
 Midland , MI 48642

Forms

Quantity: 100
 Paragon Dept No: 56052
 Dept Name: occupational health
 Company Number: 810

Order Total Price: 0.00

Item Number: MM-326
 Item Description: MMR (Measles, Mumps, Rubella)
 Revision Date: 4/2012
 Print: 2 sided black and white
 Paper: 20# White Text
 Size: 8.5 x 11
 Fold: None
 Finish: None
 Drill: None
 Misc Info: ds; black and white

VACCINE INFORMATION STATEMENT	
<p>MMR Vaccine What You Need to Know</p> <p>(Measles, Mumps and Rubella)</p> <p><small>Read Vaccine Information Statements (Vaccines) in Spanish and other languages. See www.cdc.gov/vaccines.</small></p> <p><small>There is information on other vaccine state requirements on separate vaccine state information. To see information on other states, visit www.cdc.gov/vaccines.</small></p>	
<p>1 Why get vaccinated?</p> <p>Measles, mumps, and rubella are serious diseases. Before vaccination they were very common, especially among children.</p> <p>Measles</p> <ul style="list-style-type: none"> Measles virus causes rash, cough, runny nose, eye irritation, and fever. It can lead to ear infections, pneumonia, seizures (twitching and staring), brain damage, and death. <p>Mumps</p> <ul style="list-style-type: none"> Mumps virus causes fever, headache, muscle pain, loss of appetite, and swollen glands. It can lead to deafness, meningitis (infection of the brain and spinal cord covering), painful swelling of the testicles or ovaries, and rarely sterility. <p>Rubella (German Measles)</p> <ul style="list-style-type: none"> Rubella virus causes rash, arthritis (mostly in women), and mild fever. If a woman gets rubella while she is pregnant, she could have a miscarriage or her baby could be born with serious birth defects. <p>These diseases spread from person to person through the air. You can easily catch them by being around someone who is already infected.</p> <p>Measles, mumps, and rubella (MMR) vaccine can protect children (and adults) from all three of these diseases. Thanks to successful vaccination programs these diseases are much less common in the U.S. than they used to be. But if we stopped vaccinating they would return.</p>	<p>2 Who should get MMR vaccine and when?</p> <p>Children should get 2 doses of MMR vaccine:</p> <ul style="list-style-type: none"> First Dose: 12-15 months of age Second Dose: 4-6 years of age (may be given earlier, if at least 28 days after the 1st dose) <p>Some infants younger than 12 months should get a dose of MMR if they are traveling out of the country. (This dose will not count toward their routine series.)</p> <p>Some adults should also get MMR vaccine. Generally, anyone 18 years of age or older who was born after 1996 should get at least one dose of MMR vaccine, unless they can show that they have either been vaccinated or had all three diseases.</p> <p>MMR vaccine may be given at the same time as other vaccines.</p> <p>Children between 1 and 12 years of age can get a "combination" vaccine called MMR2, which contains both MMR and varicella (chickenpox) vaccines. There is a separate Vaccine Information Statement for MMR2.</p>
<p>3 Some people should not get MMR vaccine or should wait.</p> <ul style="list-style-type: none"> Anyone who has ever had a life-threatening allergic reaction to the antibiotic neomycin, or any other component of MMR vaccine, should not get the vaccine. Tell your doctor if you have any severe allergies. Anyone who had a life-threatening allergic reaction to a previous dose of MMR or MMR2 vaccine should not get another dose. Some people who are sick at the time the shot is scheduled may be advised to wait until they recover before getting MMR vaccine. Pregnant women should not get MMR vaccine. Pregnant women who need the vaccine should wait until after giving birth. Women should avoid getting pregnant for 4 weeks after vaccination with MMR vaccine. 	<p><small>U.S. Department of Health and Human Services</small></p>
