Item Number: MM-4100
Item Description: Temperature Log
Revision Date: 8/2016
Print: 2 sided black and white
Paper: 20# White Text
Size: 8.5 x 11
Fold:
Finish: None
Drill: 3 Hole Side
Misc Info: ds; black; 3 hole side punch

TEMPERATURE LOG

Document temperatures where you arrive and before you leave for the day. Keep temperature logs on file for at least three years. Take IMMEDIATE action if your temperature check shows the current temperature in the shaded area!

Instructions: Place an "X" in the box that corresponds with the temperature (column), day of the month, and am or pm (rows) for your temperature check. For "Faster Temp-UP" please record the actual temperature. Enter your initials and the time you measure the temperature in the appropriate boxes. When calibrating your thermometer, if the discrepancy is more than 2°F from the reading on the calibrated/verified thermometer, make adjustments and document the action. Store "Faster Temp-UP" at 10°F to 11°F. IMMEDIATE temperatures should be documented once every morning when the clinic opens. Record the minimum temperature under MIN and the maximum temperature under MAX. If you have a digital data logger record the MIN/MAX temperatures on the log for both refrigerator and freezer units. If the temperature recorded is in the shaded area, TAKE ACTION, and follow your emergency response plan. Important: Always use.
