The brochure is a two-page spread with a light blue background and a dark blue header. The header on the right side says 'SURGICAL'. The left page has a section titled 'YOU are the most important member of your healthcare team. Ask questions and get the FACTS before taking opioids to manage your pain.' Below this is 'WHAT IS AN OPIOID?' with a definition and a table of common opioids. The right page is titled 'SAFE STORAGE AND DISPOSAL' and 'LEARN THE FACTS: opioids & pain management'. It features an illustration of a doctor and a patient at a desk. The bottom of the brochure includes the Michigan-OPEN.org logo and the McLaren Macomb logo.

YOU are the most important member of your healthcare team. Ask questions and get the FACTS before taking opioids to manage your pain.

WHAT IS AN OPIOID?

An opioid is a strong prescription pain medication. Possible side effects include nausea, vomiting, sleepiness, dizziness and/or constipation.

Common opioids include:

Generic Name	Brand Name
Codone	Tylenol® #3 or #4
Hydrocodone	Valium™, Nuvor™
Hydroxyzine	Clonidine™
Morphine	Morphine™, Duramorph™
Oxycodone	Percocet™, OxyContin™
Tramadol	Ultram™, Ultracet™

* Contains acetaminophen (Tylenol). Use caution if you're also taking acetaminophen separately.

SAFE STORAGE AND DISPOSAL

Store opioids out of sight and reach of children, teens, and pets

- Store opioids in private areas and lock up your pills if possible.
- Do not store your opioids in common rooms in the house (like bedrooms, kitchens) or in garages.
- Keep a count of how many pills you have left.

Dispose of all unused opioids

- Use a permanent medication drop box. To find one near you, visit Michigan-OPEN.org/takebackmap
- Drop-off at a community Medication Take Back event.
- Use your household trash as a last resort.
 - Mix opioids (do not crush) with used coffee grounds or kitty litter in a plastic bag and throw away.
 - Scratch-out personal information on the prescription label and dispose of the original container.

Do NOT flush opioids down the toilet.

Information in this brochure was developed by Michigan OPEN for the typical patient with your condition. It does not replace medical advice from your health care provider as your response may differ from the typical patient. Questions about...
