DO YOU NEED THE WOUND CARE CLINIC?
Wounds—breaks in the skin caused by disease, injury, poor circulation, diabetes, poor nutrition or other conditions—generally heal through a natural process. But wounds don't always heal the way they should. In fact, up to five million Americans suffer from chronic wounds each year. A wound that doesn't heal could put you at risk for infection and more serious complications. Wounds also can cause discomfort, pain and disfigurement and can place limits on activities and quality of life. If you have a wound that hasn't healed significantly in a month's time, the McLaren Wound Care Clinic can help. For a referral or more information, please contact us at (810) 342-5500.
