Misc Info:

- **Total cholesterol** should be under 200
- **HDL** (good cholesterol) should be over 40 and over 50 (women) with regular exercise
- **LDL** (bad cholesterol) should be less than 130 for those at average risk. For people with moderate risk it should be less than 160. For people with coronary artery disease, diabetes, stroke, or cardiovascular disease, LDL should be under 70. To lower it, eat less on fat and cholesterol in your diet and exercise regularly
- **Triglycerides** (oil) should be less than 150. High levels of dietary carbohydrates (sweets, pasta, cereal, rice) and restriction of alcohol reduce triglycerides
- **Hemoglobin (Hgb)** is a measure of red blood cells. If low, you have anemia
- **Normal fasting blood sugar** or glucose (F70-100) shows tolerance of 1 hour 120. A result over 120 may indicate diabetes
- **Hgb A1C (HbA1C)** is a measure reflecting the average blood sugar over the last three months
- **HbA1c** under 7.0 is recommended for diabetic patients
- **TSH** (Thyroid screening test) is elevated in underactive thyroid and low in overactive thyroid
- **PSA** (Prostate specific antigen) is a measure of prostate activity. Normal values are 0-4.0. Higher levels may require further testing
- **WBC** and **Differential** are white blood cells when other are high, the kidneys are not functioning optimally
- **Electrolyte** abnormalities may be caused by water pills, kidney problems, dietary deficiencies or other medical problems
- **Panel Overall Blood** is a test for hidden blood in the stool, and one step to screen for colon cancer if positive, you may need a colonoscopy
- **White Blood Cell Count** is often elevated in patients with infections
- **HPV** (Human papilloma virus) is an infection that may increase the risk of cervical cancer. For women between the ages of 19 and 65, the American Cancer Society recommends a pap smear every one to three years
- **Hemoglobin**: Please remember that about 10% of persons cannot be typed by mainstreaming, and that only donation requires a combination of typing and crossmatching, poorly crossmatched units, and poorly hemostatic

Thank you
for choosing
McLaren
HEALTH CARE
and the physicians and staff
who serve you.

Enclosed are the results of
your recent laboratory tests
for your personal file.

Please bring all medications to
your next physician appointment.
