MO-118 (6/16)

The Karmanos Cancer Institute at McLaren Macomb, located in the Ted B. Wahby Cancer Center, is committed to providing the best available treatment for patients diagnosed with cancer. Fully accredited by the American College of Surgeons' Commission on Cancer, expert physicians and health care professionals work together as a multi-disciplinary team to meet all the needs of the whole patient—body, mind and spirit. Using the most advanced, state-of-the-art technology and equipment, the cancer care team keeps the patient as the center of focus. Our program has met the rigorous standards to achieve this national accreditation.

We offer comprehensive cancer treatment—including national research clinical trials—and support services:

- **Medical oncology** is a specialty that diagnoses and treats cancer and some benign conditions using chemotherapy, hormonal therapy, and biological therapy
- **Surgical oncology** includes robotic and other minimally invasive procedures for less pain and quicker recovery
- **Radiation oncology** uses very precise, high-energy beams of radiation to selectively and safely treat cancer
- **Interventional radiology** uses image guidance to precisely administer cancer therapy
- **Orthopedic oncology** specializes in the treatment of bone and soft-tissue tumors.
- **Palliative care** focuses on providing relief from symptoms and stress of serious illness, such as cancer, to improve quality of life
- **Navigation** gives support and guidance throughout treatment to ensure delivery of quality cancer care
- **Nutrition counseling** provides education and counseling for nutrition-related problems
- **Oncology social work** addresses psychosocial services
- **Rehabilitation services** provides access to rehabilitation services through the STAR program
- **Support groups** provide additional resources for support

## Meet Our Physicians

McLaren Macomb is a leading cancer care provider, not only in treating cancer, but also in providing comprehensive, coordinated services for cancer prevention and education, early detection and diagnosis, patient and family support services, and access to clinical research.
