

# Daily Voiding Diary

Name \_\_\_\_\_ DOB: \_\_\_\_\_

Week Beginning \_\_\_\_\_

## Instructions

This chart is a record of your voiding (urinating) and leakage (incontinence) of urine. Please follow the instructions below prior to your next visit to our office.

Choose three days, not necessarily consecutive days. Keep the record when you can conveniently measure trips to the bathroom. Begin your record with the first voiding upon arising in the morning.

1. Record times of all voids, leakage and intake of liquid.
2. Measure all intake in cups.
3. Describe the activity you were performing at the time of leakage. If you were not actively doing anything, record whether you were sitting, standing or lying down.
4. Estimate the amount of leakage according to the following scale:
  1. = damp, a few drops only
  2. = wet underwear or pad
  3. = soaked or emptied bladder
5. If the urge to urinate accompanied (or preceded) the urine leakage, write YES. If you felt no urge when the leakage occurred, write NO.
6. Record the amount and type of all liquid intake using cups (1 cup = 8 oz.).
