Diagnostic Imaging Services

McLaren Greater Lansing offers a variety of diagnostic imaging services at numerous locations. McLaren uses the latest technology and non-invasive imaging for cardiovascular, breast care, oncology, and neurological diagnostics.

Our Services

Radiology - McLaren Greater Lansing Diagnostic Imaging provides superior imaging technology and specialized physician review, setting a foundation for focused care. Our team of skilled radiologists can analyze images electronically in high definition and make an accurate diagnosis. McLaren Greater Lansing's imaging services utilize advanced technology and tools including: X-Ray, CT scanning, CT/PET, vascular imaging, ultrasound, MRI, nuclear medicine, bone density screening and echos.

To schedule an appointment, call (517) 975-CARE (2273).

McLaren Greater Lansing Breast Care Center is the first and longest running mid-Michigan hospital to receive national accreditation for its breast care program by the National Accreditation Program for Breast Centers (NAPBC) from the American College of Surgeons. According to current studies, one in eight women will develop breast cancer. Early detection and screenings are the most effective ways to combat this disease. That's why McLaren Greater Lansing created a Breast Care Center that offers: ultrasound, digital mammography, bone density screening and image guided breast biopsies all in one place.

To schedule an appointment, call (517) 975-CARE (2273).

Radiology - McLaren Orthopedic Hospital Diagnostic Imaging was organized in 2004 as a medical setting for specialized services, with both inpatient and outpatient capabilities. Among the services provided at McLaren Orthopedic Hospital is X-Ray imaging.

To schedule an appointment, call (517) 975-2695.

Radiology - McLaren Greater Lansing Grand Ledge Imaging is dedicated to providing excellent primary health care services to the residents of all ages in the surrounding area. Our providers and dedicated medical staff are pleased to provide a centralized continuum of care and offer a variety of diagnostic imaging services, including: X-Rays, digital mammography, ultrasound and bone density screening.

To schedule an appointment, call (517) 626-3106.

Mid-Michigan Physicians (MMP) Imaging Center is a 10,000 square foot state-of-the-art diagnostic facility. The center opened its doors in April of 2006 with a mission to maintain cutting edge technology while maintaining personal attention. The Imaging Center services MMP as well as referring practices and provides the following diagnostic imaging services: X-Ray, CT, MRI, ultrasound, nuclear medicine, echo, digital mammography, and bone density scans.

To schedule an appointment, call (517) 913-3800.
