

> A few painless tests can save your life!

They saved Gary's.

Gary Holt, 69, from DeWitt felt that his health was in adequate shape. After suffering from a heart attack years ago, Gary believed himself to be fully recovered.

Despite having no symptoms of peripheral arterial disease (PAD), Gary made an appointment for **McLaren's PAD Plus Screening** for preventative health reasons. What he and his doctors discovered saved his life.

Gary had unknowingly developed an aortic abdominal aneurysm (AAA), a bulge in the wall of a weakened blood vessel located in the lower part of the aorta that can suddenly burst, leading to excessive bleeding and even death. Once the PAD screening revealed the danger, Gary was immediately scheduled for surgery.

Now fully on the mend, Gary feels great. His experience serves as a reminder of the importance of preventative health screenings.

Save \$5 on McLaren's
Comprehensive **PAD+**
Screening!

**\$5
OFF**

McLaren's PAD Plus is one of only six labs in the country and the only lab in mid-Michigan to be accredited for PAD screening by the Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL). We are also recognized by the Society of Vascular Ultrasound as a Signature Lab. **Only \$60, about half the cost of comparable programs.**

Appointment required, call (517) 975 8304
to register or for more information.

Expires Sept. 1, 2013

Peripheral arterial disease (PAD) is a progressive "head-to-toe" disease primarily caused by plaque buildup in the arteries. PAD affects 8 to 12 million Americans, 70 percent of whom have no symptoms. McLaren Greater Lansing offers the most comprehensive and only accredited PAD screening program available in mid-Michigan.
