

# HEART & VASCULAR DISCHARGE TIPS

Call the department at (810) 342-2046, the morning of discharge, **BEFORE** coming to the hospital to pick up your family member. The nurse will be able to give you an **estimated** discharge time.

We appreciate your patience during the discharge process. As a department, we strive for discharges before 11:00 a.m. However, this does not always occur due to scheduled tests, repeat lab work, or the need to wait for important test results before your loved one can be cleared to go home.

Please also be sure to bring your preferred method of payment for any prescriptions and/or insurance co-pays.

DOING WHAT'S BEST.
