- Hyperbaric oxygen therapy

 **McLaren**
LAPEER REGION

DOING WHAT'S BEST.

At McLaren Lapeer Region - Wound Care Center, our multidisciplinary patient care team uses the most advanced therapies to treat patients with chronic wounds. Our wound care experts are specially trained in how to treat chronic, non-healing wounds as a result of illness or trauma. Hyperbaric oxygen therapy, specialty dressings, diet and nutrition, off-loading, and negative pressure closure assistance are just some of the adjunctive advancements used to induce healing.
