SENIOR BEHAVIORAL HEALTH UNIT

There are many factors that can affect the physical, mental and emotional well-being of an older adult. McLaren Oakland created our senior behavioral health unit to address the special needs of seniors who are experiencing emotional and behavioral changes. The unit provides a safe, secure environment essential to successful inpatient psychiatric treatment.

The Senior Behavioral Health Program at McLaren Oakland services adults 45 years of age and older who have a psychiatric diagnosis and are in need of stabilization in an acute care setting. Our program is designed to meet the unique needs of elderly patients, including those who, in addition to a psychiatric diagnosis have also received a diagnosis of dementia or memory-impairment.

CARING MEDICAL TEAM PROFESSIONALS

Our multi-disciplinary team establishes a structured, supportive and safe environment where patients learn to identify problem areas and develop solutions. Combined with education and therapy, patients build skills for improved mental health and quality community living. Our team includes:

- Psychiatrists
- Psychologist
- Psychiatric Nurse Practitioner
- Registered Psychiatric Nurses
- Certified Nursing Assistants
- Psychiatric Technician
- Recreation Therapist
- Internal Medicine Physicians
- Licensed Social Workers
- Program Director

COST AND INSURANCE

Our services are covered in whole or part by most major insurance plans and Medicare. Since plans vary in coverage, family members and individuals are encouraged to discuss details with our staff and the hospital's Financial Services.

For admission and referral or more information, please contact our intake department 24/7 at (248) 338-5588.
