

# WOMEN'S HEALTH SERVICES

Skilled physicians and caregivers at McLaren Macomb provide a comprehensive range of women's health services from adolescent and preventive care to advanced robotic surgery and vein disease care.

## OBSTETRIC/GYNECOLOGICAL INPATIENT SERVICES

McLaren Macomb has assembled a team of OB/GYN physicians from a wide variety of backgrounds to meet women's health care needs before, during and after pregnancy.

- Infertility
- Family planning and pre-conception counseling
- Urinary incontinence
- Endometriosis
- Pre-menstrual syndrome
- Abnormal uterine bleeding, including alternatives to hysterectomy
- Management of hormonal imbalance
- Menopause and peri-menopause counseling and treatment
- Gynecological cancers

### Minimally Invasive Surgery

Several surgeons at McLaren Macomb are specialists in robotic-assisted surgery and minimally invasive procedures, including laser and laparoscopic surgery, plus vaginal surgery for hysterectomy. Minimally invasive procedures require a much smaller incision, so patients have a faster recovery time and a lower risk of bleeding or other complications.

## FAMILY BIRTHING CENTER

Family-centered maternity and newborn care is provided at the Family Birthing Center at McLaren Macomb. Patients can experience a safe, comfortable and relaxing environment, ensuring a first-class birthing experience, including:

- Birthing Center triage unit assists any woman who is at least 20 weeks pregnant and experiencing labor concerns
- Birthing education, including childbirth preparation classes
- Special care neonatology for neonates requiring more intensive levels of care and cardio-respiratory support
- Private birthing suites provide single-room care for the entire birth experience
- Birthing Center tours to provide a better idea of what to expect and where to arrive prior to delivery
- OB booklet available for new moms-to-be to learn about the birthing experience at McLaren Macomb
- Pediatrician visits, tests and vaccinations and birth certificate assistance before baby goes home

## BREAST CARE SERVICES

McLaren Macomb's Breast Center is committed to the early detection of breast cancer using state-of-the-art digital mammography equipment to deliver the best in breast cancer screening, diagnosis and treatment.

### Services

- Screening and diagnostic mammography, including digital and 3D imaging
- Breast ultrasound
- Breast biopsy
- Interventional procedures
- Bone densitometry

### Patient Amenities

- Walk-in screening mammography with prescription
- Screening appointments within 1 to 2 days
- Same- or next-day biopsy services
- Minimal wait times for scheduled appointments
- Rapid reporting of test results
- Reminder letter to schedule an annual mammogram

A physician referral is required for these services.
