## DEDICATED TO PATIENT CARE

Karmanos Cancer Institute at McLaren Clarkston seeks to prevent, treat and cure cancers by linking scientific discovery to expert and compassionate patient care right in your neighborhood.

Our facility is well equipped with an on-site infusion pharmacy providing immediate availability of drugs. If patients need acute care, we direct admit to our state-of-the-art inpatient oncology unit at McLaren Oakland.

Our knowledgeable physicians are well-equipped to provide the best cancer treatment. We provide personalized cancer treatment using hi-tech diagnostics and precision medicine tools. We use the molecular profile of the patient's tumor to offer an individualized cancer treatment that aims to maximize benefits from treatment while minimizing side effects. In addition to FDA approved treatment options, including chemotherapy, immunotherapy, and targeted therapies, our patients have access to clinical trials through the Karmanos Cancer Institute.

## ANTENEH TESFAYE, MD

Dr. Tesfaye completed his internship and residency at McLaren Flint/Michigan State University. He went on to complete his hematology and oncology fellowship in the Division of Hematology and Oncology at the Georgetown University-Lombardi

Comprehensive Cancer Center in Washington, D.C.

Dr. Anteneh Tesfaye is board-certified in oncology and hematology. He evaluates and treats all blood and cancer disorders with a special interest in gastrointestinal cancers. Before joining our clinic, Dr. Tesfaye had been a faculty member at Wayne State University, Department of Oncology.

He is actively engaged in research that focuses on improving patient outcomes using targeted therapies and genomic medicine. He continues his interest in clinical research at Karmanos Cancer Network for gastrointestinal malignancies. He conducts research through the National Cancer Institute (NCI) and the Southwest Oncology Group (SWOG).

Dr. Tesfaye is a member of American Society of Clinical Oncology (ASCO), American Society of Hematology (ASH), Michigan Society of Hematology Oncology (MSHO) and Michigan State Medical Society (MSMS).

He is fluent in Amharic.

"Cancer treatment is very complicated and is far beyond prescribing medications. I believe in the importance of taking care of the patient, not just a problem. Symptoms of the disease and my patients quality of life are as equally important to me as the cancer directed treatments I prescribe. I provide my patients with the best available treatment options, including experimental treatments. I know when to push the limit, I know when I shouldn't. I do my best to make a difference in the lives of the cancer patients, whose path crosses mine."

## SERAPHIM PALLAS, MD

Dr. Pallas completed his internship and residency at Henry Ford/Michigan State University. He completed his hematology and oncology fellowship at Henry Ford Hospital in Detroit.

Dr. Pallas is board-certified in oncology. He evaluates and treats all blood and cancer disorders.

He is actively engaged in research that focuses on improving patient outcomes using targeted therapies and genomic medicine.

Dr. Pallas is a member of Michigan Society of Hematology Oncology (MSHO). He is an active member Karmanos Cancer Institute, McLaren Oakland tumor board and is the physician chairman of the cancer committee.

Dr. Pallas is fluent in German and Greek.

"My patients are at the center of all I do. I care about how they feel about their disease, treatment and recovery. I strive to give them the needed information for them to make an informed decision in their care. I listen to their concerns and work to address their questions in order for them to make the most appropriate choices for their care."
