

# McLAREN OFFERS MSK ULTRASOUND IN FLINT AND FENTON.

Musculoskeletal (MSK) Ultrasound is now available at the McLaren Imaging Center - Flint (501 S. Ballenger Highway in Flint) and McLaren Imaging Center - Fenton (2420 Owen Rd. in Fenton).

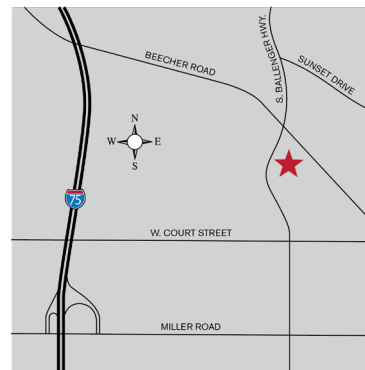

MSK Ultrasound uses sound waves to produce pictures of muscles, tendons, ligaments, nerves and joints throughout the body, allowing real-time diagnosis.

## INDICATIONS FOR MSK ULTRASOUND:

- **Shoulder** – Rotator Cuff and Bicep Tendon Pathology
- **Elbow** – Ligament and Tendon Pathology
- **Wrist/Hand** – Ganglion Cysts and Synovitis and Tenosynovitis
- **Hip** – Hamstring Pathology
- **Knee** – Quadriceps & Patellar Tendon Rupture
- **Foot and Ankle** – Evaluate Achilles and other tendons
- Evaluate for Morton's Neuroma and bursitis
- Evaluate for plantar fasciitis or plantar fascia rupture
- Conventional radiographs of the foot and/or ankle
- CT foot and/or ankle with 3-Dimensional reconstruction

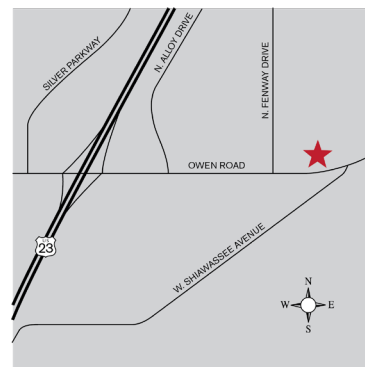

## ADVANTAGES OF MSK ULTRASOUND:

- No radiation exposure
- Contrast injections and aspirations is not required
- Real-time, high resolution soft tissue imaging
- Patient interaction during the study
- Minimally affected by metal implants or fragments
- Alternative to MRI for claustrophobic and obese patients
