

MRI ADDED TO COMPREHENSIVE IMAGING SERVICES AVAILABLE AT McLAREN FENTON

McLaren Fenton has expanded its comprehensive imaging services to include MRI diagnostic testing. The mobile Ingenia 1.5T S MRI brings revolutionary high-quality imaging, with a high-quality patient experience to this location. The advanced technology results in high-quality exams that take less time for most patients. The MRI has a wider bore opening for more comfort and most scans can be performed with the patient's head entirely out of the opening for those who may worry they will have to be in an enclosed space. Additional benefits include a better audio and visual experience to help patients relax, an AutoVoice system that gives clear instructions during the scan process and a ComforTone component that reduces scanner noise.

Imaging Services at McLaren Fenton Include:

- MRI
- 3-D mammography
- CT
- X-Ray
- Bone Density
- Ultrasound

McLaren Fenton is an ACR designated lung cancer screening center and mammography accredited facility. To achieve the ACR Gold Standard of Accreditation, the facility's personnel qualifications, equipment requirements, quality assurance, and quality control procedures have gone through a rigorous review process and have met specific qualifications.

Every aspect of the ACR accreditation process is overseen by board-certified, expert radiologists and medical physicists in advanced diagnostic imaging.

Patients in need of a low-dose screening for lung cancer can learn more at mclaren.org/fentoncancerscreening

Women in need of a screening mammogram can schedule an appointment online at the same link.

Saturday appointments available for some imaging services.
