

## DOING WHAT'S BEST.®

In our sincerest efforts to serve you, we also want to conserve natural resources and help the environment.

Before your arrival, this room was thoroughly cleaned and supplied with fresh linens. To help the environment through reduced usage of water, energy and potentially harmful detergents, our standard is to change bed linens if they are visibly soiled or more often if requested. If you would like your bed linens changed more often, we will gladly do so. Just ask your nurse or nurse aide.

Additionally, bathroom linens such as towels and washcloths can be used more than once. Hanging your towel/washcloth on the rack or hook means you will use it again. A towel/washcloth on the floor means you would like it replaced.

*Thank you for helping us help the environment!*
