

# FAMILY MEDICINE RESIDENCY CLINIC

## OUR MISSION

At McLaren Greater Lansing's Family Medicine Residency Clinic, we provide expert care for patients of all ages and for a variety of medical conditions, including care of newborns, children, adolescents, adults, and seniors.

## WHAT IS A RESIDENT?

Residents are licensed physicians who have completed four years of medical school and are doing additional on-the-job training in their medical specialty. At our clinic, residents complete an additional three-year program focused on the specialty of family medicine.

## WHAT IS OSTEOPATHIC MANIPULATION?

Within the human body, bones, muscles, nerves, and organs are intricately related. A disruption in any of these components can create an imbalance. This may manifest as increased pain or restriction of normal function in the body. We use osteopathic manual manipulation (OMM) to diagnosis and treat such conditions, either as an alternative to or in conjunction with standard care. There are several different techniques, which can be tailored to each patient, based on their needs and the goals of treatment.

## PHYSICIAN TEAM

Because we are a residency clinic, our physicians work in teams. You will be seen primarily by the resident physician. The residents work closely with an experienced faculty physician who oversees all patient care. Therefore, you will have two physicians taking care of you, as well as our dedicated clinical staff.

## WHAT WE PROVIDE

Services include:

- Well child and adult visits
- Geriatric care
- Immunizations
- Comprehensive disease management
- Patient education and health instruction
- Office procedures: skin care, female health, heart (ECGs), and lung care (spirometry)
- Osteopathic manual manipulation

## CLINIC INFORMATION

We take most insurance, including Medicare and Medicaid. Same-day appointments are available.
