

WOMEN'S WELLNESS CLINIC

OFFERING A CONTINUUM OF CARE

At the Karmanos Cancer Institute, we stand alongside our patients throughout their breast cancer journey, from the time of diagnosis through treatment and recovery. Health care services aren't finished once a patient is cancer-free. We understand the importance of ongoing care and careful monitoring for cancer recurrence.

In coordination with your oncologist, surgeon or primary care physician, our highly trained nurse practitioners offer continued care and monitoring after treatment for your health and well-being.

Our Women's Wellness Clinic offers these services at our Alexander J. Walt Comprehensive Breast Center in Detroit and Weisberg Cancer Treatment Center in Farmington Hills:

- Follow-up care for breast cancer survivors, including late or persistent treatment-related effects and close monitoring of all aspects of health
- Continuation of hormone therapy to reduce the risk of cancer recurrence
- Menopause symptom management
- Close monitoring for cancer recurrence
- Sexual health counseling and education
- Supportive care services, including referrals to community resources and support groups

Our experts specialize in the type of follow up care breast cancer survivors need. You do not have to have a history of cancer to see our nurse practitioners at our Women's Wellness Clinic.
