McLAREN SAFETY FIRST is our System-wide Electronic Reporting Program that is used to help capture, identify and address Safety Risks while continuing to promote a culture of transparency and patient safety.

By reporting events in McLAREN SAFETY FIRST, we are able to share this information system-wide, implement process improvements and ensure that our patients are receiving the best possible care in the safest environment.

Example of events and concerns that should be reported:

Spec Info:

- Delay in Care: STAT imaging/lab orders not being completed in a timely fashion.
- Infection Issues: Hospital / Facility acquired illnesses, ulcers, etc.
- Near Misses/Other Safety Concerns: Potential events/incidents that occurred but did NOT reach the patient and have potential for harm.
 - Medication Errors (incorrect medication/dosage/rate prepared but caught prior to administration)
 - Incident Reporting for Surgery (incorrect site/body part/patient) caught prior to surgery)
 - Patient on fall precaution attempts to get out of bed, begins to fall but is caught by RN.
- Equipment Issues: Helps to identify trends in user error as well as potential faulty/malfunctioning equipment.
- Security/ Safety Issues: patients leaving AMA/Dispensary, patients violent towards staff, etc.
- Patient Identification and/or Consent Issues
- Visitor Falls/Injuries
- Employee/Staff Injuries

If you have any questions regarding McLaren Safety First, please contact Jodi Swain at jodi.swain@mcclaren.org.
