**PATIENT TRANSFER CONSENT FORM**

**SECTION TO BE COMPLETED BY THE PHYSICIAN**

**I. Patient Condition**  
 Does the patient have an emergency medical condition?  Yes  No

Select One:  
 Stable: The patient has been stabilized such that, under reasonable medical probability, no material deterioration of the patient's condition is likely to result from transfer. No other significant risks have been identified as associated with the patient's condition.  
 Delaying the treatment: Under reasonable medical probability, no material deterioration of the patient or child is likely to result from transfer.  
 Unstable: The patient's condition can be stabilized prior to transfer.  
 Delivery Imminent: The patient is a pregnant woman having contractions and there is inadequate time to safely transfer her to another hospital before delivery or transfer may prove a threat to the health or safety of the patient or the unborn child.

**TO BE COMPLETED WHEN TRANSFERRING AN UNSTABLE PATIENT**

The patient's emergency medical condition has not been stabilized. I have explained to the patient/legal representative the risks and benefits of transfer and medical treatment at the receiving facility.  
 I have explained the risks and benefits of transfer to the patient and based on information available at the time of the patient's examination, the medical benefits reasonably expected from the provision of appropriate medical treatment at another facility outweigh the increased risks, if any, to the patient's medical condition from effecting transfer.  
 I am unable to verify that the increased risks to the patient from effecting transfer are outweighed by the reasonably expected medical benefits of appropriate treatment at the receiving facility.
