Poster:
Misc Info: 2 sets; 2 part; stapled

**McLaren Flint is participating in Medicare's
Comprehensive Care for Joint Replacement (CJR) Model**

McLaren Flint is participating in the Comprehensive Care for Joint Replacement (CJR) model. Medicare designed this model to encourage higher quality care and greater financial accountability from hospitals when Medicare beneficiaries receive lower-extremity joint replacement procedures (LEJR), typically hip or knee replacements. McLaren Flint's participation in the CJR model should not restrict your access to care for your medical condition or your freedom to choose your health care providers and services. All existing Medicare beneficiary protections continue to be available to you.

The CJR model aims to help give you better care.

The CJR model aims to support better and more efficient care for beneficiaries undergoing LEJR procedures. A CJR episode of care is typically defined as an admission of an eligible Medicare beneficiary to a hospital participating in the CJR model for an LEJR procedure. This model uses episode payment and quality measurement for an episode of care associated with LEJR procedures to encourage hospitals, physicians, and post-acute care providers to work together to improve the quality and coordination of care from the initial hospitalization through recovery. Under the CJR model, McLaren Flint can earn additional payments from Medicare if we meet the high quality goals set by Medicare, while keeping hospital costs and care spending under control. If we don't meet these quality and cost goals, we may have to repay Medicare.

Medicare is using the CJR model to encourage McLaren Flint to work more closely with your doctors and other health care providers that help patients recover after discharge from the hospital including, but not limited to, nursing homes (skilled nursing facilities), home health agencies, inpatient rehabilitation facilities, and long-term care hospitals. If you require a stay in a Skilled Nursing Facility (SNF) to assist with your recovery from surgery and if, and only if, it is clinically appropriate, the CJR model permits McLaren Flint to discharge you to a high quality SNF sooner than the three days Medicare usually requires to cover a SNF stay.

Medicare will monitor your care to ensure you and others are receiving high quality care.

McLaren Flint entered into financial arrangements with collaborating health care providers and suppliers who are engaged in care redesign with the hospital and who may furnish health care services to you during your episode of care. Under these arrangements, McLaren Flint may share payments received from Medicare as a result of reduced episode spending and hospital inpatient cost savings with collaborating providers and suppliers. McLaren Flint may also share financial accountability for increased episode spending with collaborating providers and suppliers.

Spec Info:

The following list includes health care providers and suppliers that have established a financial arrangement with McLaren Flint in order to share in financial rewards and/or losses in the CJR model: Norman E. Watten, MD; Sean E. Wilson, MD; Matthew C. Sardell, MD; Paul M. Tashowski, MD; and Ajay Srivastava, MD.
