**COMPREHENSIVE AND INTEGRATED HEALTH CARE**

Our patient centered medical home neighborhood is health care focused on you, the patient. It is a partnership between you, your primary care provider, and us. As your specialty doctor we work within your health care team to provide all of your health care needs.

As part of your health care team, we are partnering with your primary care provider (PCP) and coordinating your care. We are sharing their commitment to effectively and efficiently co-manage your care over time. As your specialist we will be sharing limited or long-term management of your condition with your primary care provider. We will provide advice, guidance, and periodic followup until your illness is stabilized or treatment is completed.

The Goals of a Patient Centered Medical Home Neighborhood (PCMH-N) include:

- A discussion with you and your health care team regarding your health care goals.
- Asking for your input in planning your care and designing a plan that you can follow.
- Exploring methods to appropriately care for you, and ways to help you care for yourself.
- A reminder when appointments or tests are due so that you receive the highest quality of care.
- Provide access to medical care 24-hours a day, 7 days a week.

The PCMH-N concept includes an agreement between the specialist, provider and the patient that acknowledges the role of each in a total health care program. We will always respect you as an individual without discrimination, and will always consider your privacy and confidentiality. We will remain committed to providing the highest quality of care and professionalism.

**Spec Info: CARE COORDINATION**

If you are hospitalized, following up with your primary care provider is essential to your recovery and minimizes possible complications. You should schedule an appointment with your primary care provider within 7 days after discharge. Case Management Services are available to assist you with transportation needs, education, or other concerns. For more information or to access services, please contact our care coordinators at (844) 388-9877.

**EMERGENCIES**

Regardless of the time of day or night, if medical attention is needed please contact your PCP office for medical advice, emergency care, and/or guidance in their preferred after-hours care facility. If you are having complications related to our specialty we are available 24/7 by calling (888) 657-2370. Call 911 or go directly to the nearest emergency room if you are having any of the following:

- Chest pain
- Signs of a stroke (numbness, paralysis, slurred speech)
- Heavy bleeding that does not stop in 15 minutes
- Extreme shortness of breath
- Poisoning
- Severe burns
- Head injury or trauma
- Complicated fracture
- Homicidal feelings
- Seizures
- Pregnancy complications
- Suicidal feelings
