

CLINICAL HEALTH PSYCHOLOGY FELLOWSHIP POSITIONS AVAILABLE

ACADEMIC HEALTH
PSYCHOLOGY PROGRAMS

MAHPP is an equal opportunity employer with a strong commitment to recruiting and retaining members of diverse backgrounds. MAHPP welcomes all applicants without regard to race, color, religion, national origin, gender, age, sexual orientation, gender identity or expression, marital status, number of dependent children or the ages of the children, physical or mental disability, genetic information, status as a protected veteran or any other basis on which discrimination is prohibited. MAHPP respects the diversity and identity of all applicants and would be honored to be considered by those from all backgrounds.

ABOUT MAHPP

MAHPP (originally CAPT, Consortium for Advanced Psychology Training, then MICAPT, Michigan Center for Advanced Psychology Training) was THE FIRST program in the country to be APA-Accredited in Clinical Health Psychology! We have been training fellows for over 30 years and have a highly reputable training model. MAHPP consists of postdoctoral fellowships at McLaren Flint, internships at McLaren Macomb, and a close partnership with Hurley Medical Center. MAHPP follows a clinician-educator model that allows fellows to:

- Develop advanced competency in Clinical Health Psychology
- Obtain unparalleled experience and training in Medical Education
- Assume leadership roles in medical centers and medical residencies upon graduation
- Make meaningful scholarly contributions to the field

One half-day per week is devoted to shared didactics with MAHPP fellows and fellows from other local programs. The didactics are designed to provide in-depth training and knowledge of clinical health psychology concepts and skills. This collegial environment promotes optimal learning, professional networking, and peer support. The didactic curriculum consists of the following series:

- Professional Values & Attitudes of a Clinical Health Psychologist
- Clinical Health Psychology Interventions
- Medical Education, Teaching, and Supervision
- Psychopharmacology
- Rehabilitation Psychology
- Individual and Cultural Diversity
- Management, Leadership, and Advocacy
- Wellness
- Journal Club

Upon successful completion of the MAHPP program, fellows possess advanced clinical competency in Clinical Health Psychology, with sufficient preparation to be credentialed and ultimately Board certified by ABPP. In addition to high quality clinical experiences, comprehensive didactic training, and opportunities for scholarship, MAHPP offers competitive salaries and a variety of benefits.

Consultation-Liaison (C-L) Service

All Fellows will spend at least one full day per week running a thriving Consultation-Liaison service in our 378-bed teaching hospital. Fellows manage the service, respond to inquiries from treatment teams, and complete consults. Fellows work collaboratively with various specialties, including Internal Medicine, Neurology, Cardiology, and Physical Medicine and Rehabilitation on all medical units of the hospital. Fellows are highly-valued members of the treatment team, assisting with cases related to medical decision-making capacity, adjustment to medical conditions and adherence, psychiatric symptoms/diagnoses, and substance-related issues. All fellows provide CL coverage on the weekends on a rotating basis, along with supervising faculty, resulting in being on-call approximately once per month. Fellows also provide CL coverage for the holidays, along with supervising faculty, resulting in being on-call for two holidays in the first year, and one holiday in the second year.

PGY1 CLINICAL HEALTH PSYCHOLOGY ROTATIONS

Clinical Health Psychology (CHP) 1

Fellows spend a majority of this rotation embedded in the Family Medicine and Internal Medicine Clinics providing IPC services to a wide variety of patients. Following the Hunter-Goodie model, fellows provide brief, function focused assessments and interventions at the time of patients' medical appointments. Common referrals range from lifestyle change (i.e., smoking cessation, weight management) to mild psychiatric symptoms (i.e., depression, anxiety). Several transdisciplinary clinics are also run, including Geriatric Assessment Clinic and Diabetic Comprehensive Clinic. Fellows maintain strong collaborations with Family Medicine and Internal Medicine Physicians, promoting optimal patient care and satisfaction. Though not the primary focus of this rotation, fellows often have the opportunity to provide education to FM and IM residents through co-managing patients, and to doctoral level practicum students who are also providing IPC.

Clinical Health Psychology (CHP) 2

As an ever-evolving rotation, fellows gain exposure to various specialties within the medical setting. Current experiences on this rotation include psycho-oncology, bariatric care, and pain management. At the McLaren Bariatric and Metabolic Institute, experiences include providing pre-surgical psychological assessments, outpatient psychoeducational groups, post-operative follow-up assessment and intervention. In collaboration with the Pain Management Specialists at McLaren, fellows provide assessment and treatment to patients with chronic pain, including pre-surgical psychological evaluations for spinal cord stimulator or intrathecal pain pump surgical candidates. Fellows may also be involved in the development and implementation of a chronic pain group visit.

PGY2 MEDICAL EDUCATION ROTATIONS

Medical Education (ME) 1

On this rotation, fellows engage in numerous medical education activities with a variety of learners. They are responsible for formal didactics in the Family Medicine Residency and Michigan State University Medical Student Psychiatry Clerkship. Fellows have the freedom to create their own curriculum, develop lecture series, and deliver didactics in a highly engaged learning environment. Fellows also engage in live observation and shadowing with residents and students, providing assessment and feedback on clinical interviewing skills and appropriate identification and treatment of behavioral health issues. Video Review of patient-doctor encounters, curbside consultation, and formal assessment of learners' skills are additional components of this rotation. Fellows develop strong knowledge of the medical education system, including Accreditation Council for Graduate Medical Education (ACGME) program requirements, and are highly competitive for jobs in the medical education field upon graduation from fellowship.

Medical Education (ME) 2

In addition to activities on ME 1 Rotation, Fellows participate in the Michigan State University Medical Education Fellowship, which provides them with in-depth training on evaluating and teaching within medicine. Fellows obtain a Certificate in Medical Education upon completion of this fellowship. Additional activities on this rotation include participation on our Determinants of Healthy Learners program for all Intern Residents across the McLaren system, telehealth coaching of residents to enhance their learning plan and success in residency, and development and delivery of content for the Integrated Primary Care Certificate Program.

McLaren's Medical Education Building which houses the Clinical Health Psychology Fellowship program.

Salary and Benefits

Fellows receive a competitive salary and variety of fringe benefits. Benefits at McLaren Flint include medical, vision, dental insurance, disability coverage, continuing education (CE) stipends, flexible spending accounts, retirement 403b options, meal funds, paid personal time off, and conference and scholarly activity funding support.

McLaren Flint Salary PGY1: \$57,165.00, PGY2: \$58,879.95

McLaren CE: a generous stipend is provided annually for continuing education

McLaren Meal Funds: \$1,200 per year

McLaren Research Funds (Available on an application basis):
\$1,200 twice per year

All salary and benefits amounts are subject to change.

All interested applicants must apply through the APPIC Psychology Postdoctoral Application (APPA CAS) at www.appic.org/Postdocs/APPA-CAS-Postdoc-Application-Information, OR email application materials to MAHPP@mcclaren.org.

Feel free to contact Dr. Erin O'Connor (McLaren Program Director) or JeSonja Lee (McLaren Academic Program Administrator) at MAHPP@mcclaren.org or (810) 342-3062 with any questions.
