Print:
Paper:
Size:
Fold:
Finish:
Drill:
Poster:
Misc Info: 8.5x11 Color SS Bleed 80# Offset Text

Spec Info:

WHAT IS A FCE?

Functional Capacity Evaluation (FCE) is a performance-based comprehensive functional test to measure a person's ability to safely perform the main job functions of daily work.

An FCE helps to inform an individual and their provider of their functional abilities compared to a base level of expected averages. The test assists in making an informed decision about when they are ready to return to work.

When a worker is injured, refer them to our experts for a comprehensive assessment of the injury and how it affects their ability to meet the demands of specific job tasks. After the assessment, we create a highly structured and individualized rehabilitation plan to get them feeling better and safely back on the job.

WE CAN HELP EVALUATE PERFORMANCE:

- Lifting, Carrying
- Sitting, Standing
- Pulling, Pushing
- Walking
- Crawling
- Climbing
- Rotating
- Balance
- Coordination and more
