department. **Diagnostic imaging:** Any x-rays, ultrasounds or other nuclear medicine tests ordered by your physician will be performed at the Radiology department.

Lab services: Any blood tests or other specimen testing will be performed by the Laboratory department.

Wound management/Enterostomal therapy: When needed, specialists are available to provide care and instructions for all types of colostomies and wounds.

DISCHARGE

Soon after your admission to the TCU, our social worker will begin discussing your discharge plan with you. Assistance will be given in making referrals to various community resources to assist you and your family in planning for your discharge. The TCU residents can take advantage of home care services through McLaren Visiting Nurse and Hospice or any agency of their choice.

YOUR TEAM (CONTINUED)

Therapeutic recreation: Recreational therapy supports residents' goals to improve their health and quality of life through a variety of recreational activities, including individual and group choices. A comprehensive leisure assessment is completed upon admission, and an individualized plan of care is developed with each resident's input to establish a meaningful activity program.

Dietary services: A registered dietician will evaluate your needs and make appropriate recommendations to your physician. Individualized diet snacks may be personalized to your needs and desires.

Pharmacy: All medications must be ordered by your physician. Medications are available through the McLaren pharmacy. Whether a new medication or a medication you have been taking at home, your physician here at the TCU along with your nurse will manage your medication regimen.

Respiratory therapy: Any oxygen therapy or breathing treatments ordered by your physician will be available through the Cardio-Pulmonary
