CIRCUMCISION CARE

FIRST 24 HOURS

1. Keep pressure off the penis for the first 24 hours. Sit him on your lap or lean him forward when burping.
2. Apply Vaseline ointment to the tip of the penis during your hospital stay. We will supply this during your stay.
3. Please ask your physician or nurse if you have any questions or concerns.

UNTIL BABY'S FIRST CHECK UP

1. Keep circumcision moist. Apply a fingertip size drop of Vaseline to the tip of the penis after every diaper change.
2. Clean the penis with baby soap and water every time the baby has a bowel movement.
3. To avoid irritation, do not use baby wipes on the penis until after baby's first check up with their pediatrician.
