GENITOURINARY MULTIDISCIPLINARY TEAM

The Genitourinary (GU) Oncology Program includes surgical oncologists, medical oncologists, radiation oncologists, radiologists, pathologists, pharmacists, nurse practitioners, dietitians, social workers and genetic counselors. The team is entirely focused on treating genitourinary cancers and shares its collective expertise to create a customized treatment plan for each patient.

THE KARMANOS ADVANTAGE

Our specialists make the Karmanos Genitourinary Oncology Multidisciplinary Team one of the best in the nation. Included are national leaders and recognized experts in the treatment of these cancers. Several team members are recognized as "Best Doctors" in the United States. In addition, our team members are actively involved in clinical research revolving around genitourinary malignancies to develop new standards of care for our patients.

Each patient will receive personal attention from the GU MDT. During your patient's initial visit, a physician will review their medical records and medical history, X-rays and pathology slides. Our experts use the latest technologies, including the da Vinci® Xi™ Surgical System and cryotherapy to achieve optimum success.

CONTINUITY OF CARE

To refer a patient, email newpt@karmanos.org, call the referring provider line at 1-877-KARMANOS (1-877-527-6266), visit karmanos.org/refer or scan the QR code below to access the online referral form.
